EXPERIENCE

Institute Of Advanced Network Technology (IANT)

June. 2023 – July. 2023

- Completed hands-on training in **Python programming fundamentals**, including variables, loops, functions, and object-oriented programming.
- Developed problem-solving skills by working on basic coding exercises and mini projects.
- Developed a secure password generator using Python.
- Implemented random character generation with letters, numbers, and special symbols.

PROJECTS

Virtual Mouse

- * Developed a **virtual mouse system** that controls **cursor movement using hand gestures** through a webcam.
- * Used gestures such as finger movement, pinch, and hand signs for mouse actions like **click, scroll, and drag**.
- * **Integrated Python libraries** such as **OpenCV** and **MediaPipe** for image processing and gesture recognition.
- * **Improved user interaction** by creating a touch-free and user-friendly control system.

AI-Driven Speed Breaker Detection and Alert System

- Developed an AI-based road safety system to **detect speed breakers** in real time and **alert drivers** in advance.
- Used machine learning and computer vision for road object detection.
- Provided real-time audio/visual warnings for **safer driving**.
- **Improved detection accuracy** under varying road conditions.

EDUCATION

Jhulelal Institute Of Technology

B.Tech in Computer Science and Engineering

Sept. 2024 – Present

Nagpur, Maharashtra

Anjuman Polytechnic, Sadar Nagpur

Diploma in Computer Engineering

2021 – 2024

Nagpur, Maharashtra

SKILLS

Languages : Python, Java, PHP, C, C++, JavaScript (React.js), HTML/CSS, SQL (MySQL)

Tools : Jira, Gitbash, GitHub, Google Stitch

ACHIEVEMENTS

- Achieved 91% in an industry-recognized NPTEL online certification course, reflecting dedication to continuous learning and skill development.
- Volunteered in college technical events and student activities.
- Built academic mini-projects demonstrating practical application of programming concepts and problem-solving skills.
